	<i>QUALITY-ENVIRONMENT POLICY</i>	DS5300.006.DOC	

QUALITY/ENVIRONMENT POLICY

The policy of Somec S.p.A. is to supply products able to satisfy initial and subsequent Customer's needs and expectations from the very first to the last stage of the works with regard to agreed price and respect to the competitors, in conformity with the Regulations in force and, as a base of principle, respecting the Environment.

Taking care of the Customer is the main commitment of our Organization at all the levels, from the management to the staff. The continuous improvement of the Quality System and the respect of the Environment, realized with the participation of all the staff, is recognized as a key factor as it makes the product reliable and trustworthy, guaranteeing the satisfaction of the Customer and improving the company image, competitiveness and profitability.

The contribution of all the employees and suppliers is essential to achieve such targets. It is therefore necessary to instruct, maintain and improve a relationship and a full comprehension of the technical problems.

It is essential as well to improve the internal organization and the QUALITY in all the activities. The verification and inspection of the application of UNI EN ISO 9001 and UNI EN ISO 14001 rules, as well as their respect and maintenance throughout the time, is the main task of Quality Assurance function (which responds directly to the Direction).

The continuous improvement of QUALITY and ENVIRONMENT protection can be more effectively achieved trying to anticipate the problems rather than solving them later on. Through Risk Based Thinking it is possible to address both risks and opportunities in order to increase the effectiveness of the quality / environment management system, achieving better results and preventing negative effects.

The devotion of each person to QUALITY improvement and ENVIRONMENT protection requires the application of management systems aiming to the progressive improvement in the different departments in order to identify the problems and experiences and be able to anticipate the problems in the future.

The Top Management commits itself to make available resources, economical means and adequate competence for the correct functioning of the QUALITY AND ENVIRONMENT INTEGRATED SYSTEM.

The Top Management also commits itself to:

- *Respect the laws, rules and particular instructions in the Environmental Management;*
- *Monitor the environment impact by using improving technology processes;*
- *Know, monitor and reduce the environment impact, in particular improving the use of energy resources and reducing waste production;*
- *Adopt procedures for Environment Protection in compliance with the regulation UNI EN ISO 14001.*

The policy and the targets of QUALITY AND ENVIRONMENT Integrated System are re-examined and re-defined according to specific procedures aiming to assure the observance of this policy.

The present policy is applied during the phases of designing, production and installation of continuous curtain walls integrated system made by glass, metal and stone, fixtures characterized by high mechanical, technical, acoustic and fire-resistant performances and partitions for interiors made of metal profiles for marine sector.
